

KOBELCO

CRAWLER CRANE

KOBELCO Cranes offer new dimension of flexibility for bucket, material handling and building construction.

CKS SERIES

- CKS600
- CKS800
- CKS900
- CKS1100
- CKS1350
- CKS2500
- CKS3000

7000 SERIES

- 7120S
- 7250S

Features

- 1 Wet-type disc brake that offer powerful, stable breaking.
- 2 Switch between Dual & Independent circuit system. Both circuits are available with a single touch.
- 3 An Auto Idle Stop (AIS) Function for Eco-driving. AIS functions to stop the engine when the vehicle is stop.
- 4 Improved state recognition with over swing preventative & machine inclination sensor.
- 5 'G-Winch' that provides higher speed without rising engine speed.
- 6 'G-Engine' that improves fuel consumption by approximately 10% when compared to operation of normal crane
- 7 Automatic soft-stop function that mitigates shock when automatic stop occurs.
- 8 A super-fine filter to reduce scrap and extends the intervals between changes, significantly reducing the burden on the environment.

Major Attachment That Make Transport More Efficient

A "nested-boom" that is easy to transport efficiently.

A "boom-connector pin holder" that prevent losses during assembly and disassembly

A folding "Axle Extension Adapter", saving on labor

"Guy cable stowing bracket" that can be securely fastened
