

Donaldson Delivers

Hydraulic Filtration Solutions for Mobile and Industrial Applications

Spin-ons • Cartridges • In-tank • Low Pressure • Medium Pressure • High Pressure • Duplex • Accessories

Performance Under ^{any} Pressure

Low Pressure

Low pressure filters are the most commonly used type of filter in hydraulic circuits, used most often in return line applications.

Donaldson low pressure filters are rated for working pressures up to 350 psi (2400 kPa). In-tank and in-line configurations are available to accommodate virtually any application.

Medium Pressure

Medium pressure filters can be used in applications up to 2000 psi (13790 kPa). Donaldson offers both spin-on and in-line cartridge-style filters.

Donaldson Duramax® filters are the highest rated medium pressure spin-on filters available. Duramax filters are proven, reliable, long-lasting and easy to install.

High Pressure

High pressure filters are positioned between pumps and critical components such as cylinders, motors and valves. They help protect these critical components from catastrophic failure.

Donaldson heavy-duty high pressure filters are rated for working pressures up to 6500 psi (44818 kPa). Various porting sizes and types, including manifold style, are available for a wide range of applications.

Donaldson Blue® Cartridges

Donaldson Blue hydraulic filters deliver better system protection than the competitors' best filters. They deliver the optimal balance of efficiency, capacity and flow restriction.

Donaldson Blue hydraulic filters help protect equipment, reduce maintenance cost and increase equipment uptime – which has a direct impact on your bottom line.

Full line of hydraulic in-line and reservoir accessories available, including advanced T.R.A.P.™ reservoir breather technology.

DT High-Performance Cartridges

Donaldson high-performance DT cartridge filters provide protection from the particles and contaminants that reduce the effectiveness of lubricant and hydraulic fluid. DT cartridge filters feature an advanced pleat pack design and are engineered to fit many competitive applications.

Off-Line Filtration

The Donaldson Filter Cart, Filter Panel and Filter Buddy™ offer convenient off-line filtration, flushing and fluid transfer. Off-line filtration supplements system cleanliness. Use with industrial and mobile equipment to achieve and maintain proper ISO cleanliness levels.
